MODEL #838W 8 Ton Hydraulic Aircraft Jack

When the need is for a versatile aircraft jack that can accommodate the needs of a busy FBO, the Model #838W is the choice. Model #838W provides all the strength and versatility needed to accommodate larger aircraft. This unique design allows the Model #838W to easily convert from a 26" low wing aircraft jack to a 32" or 38" aircraft jack, avoiding the high cost of having to purchase model specific jacks. Now with "Tilt & Go" wheels and convenient handle storage for greater value.

EFFECTIVE RANGE: 26"- 43", 32"- 49", 38"- 55"
RAM CAPACITY: 8 Tons (16,000 lbs)

Jack Features

- **Highly Versatile** - shipped with adapters for 26", 32" & 38" heights
